

World Leaders In Load Monitoring Technology

Member of Lifting Equipment Engineers Association

Introducing you to the most powerful loadcell testing service in the UK...

MACHINE SPECIFICATION

- Guarantees accurate testing and calibration of your loadcell equipment.
- Class I test machine.
- Calibrated by the **National Physical Laboratory**.
- Tests up to 350 tonnes of compression - max 470mm.
- Tests up to 350 tonnes of tension - 285-675mm centres.

Benefits of Straightpoint Calibration Service

- Tests all manufacturers and types of loadcell equipment.
- Built to Straightpoint's own specifications, global specialists in loadcell manufacture.
- Protects the safety of its operators.
- Prolongs the life of equipment, saving outlay on new equipment.
- Ensures ultimate accuracy.
- Fast test and calibration turnaround time.

As well as our 350t machine, we also have a range of rigs for calibration and testing from just 5kg upwards:

- **250kg dead weight rig**
- **5t hydraulic tensile rig**
- **5t hydraulic compressive rig**
- **50t hydraulic compressive rig**
- **50t hydraulic tensile rig**

GET A FREE QUOTATION

For an instant quotation for your test and calibration needs, call us on **+44(0)2392 484491** or email **sales@straightpoint.com** with your contact details and we'll call you back.
